

# **DIGITAL PHOTO PRINTER**

# **DS620**

One of the **most compact professional printers** that promises high performance and quality!

## ▶ Panoramic Print

The DS620 can produce stunning 6x14" and 6x20" panoramic photos - printed from 6x8" media.

(\*\* this feature only works with certain printing software, please contact local distributor for details.)

## Compact size and light weighs

One of the smallest professional printers in market and weighs only 12kg which provides maximum portability in its class.

## ▶ Different photo finishing all from one media

In addition to Glossy and Matte, Fine Matte and Luster are also available in print mode.

# Fast Printing Speed

With printing speed of 8.4 sec per print \*\*, DS620 can produce up to 400 prints (4x6") per hour.

(\*\* when two 4x6" sizes are printed using 6x8" media)

### Power Saving

The new 'Standby Mode' feature reduces power consumption to minimum (<0.5W) when printer is not in operation.

#### Other feature

Partial matte - able to print special effect of partial matte on a glossy photo.

(\*\*require software development with SDK.)

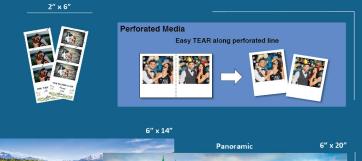

Providing flexibility on photo formats.
Utilizing rewing function, your print work can run
efficiently and operatively with reduced media waste.

Rewind function is operative upon printing 5"x7" or 6"x8"
